

FOR IMMEDIATE RELEASE

Intuicom®, Inc. Announces BroadbandPro 2.0 Network Configuration and Management Software With Industry-First GPS Geo-Location.

Orlando, Florida - World Congress on Intelligent Transportation Systems (October 18, 2011) - Intuicom, Inc. has announced the latest version of their network configuration and monitoring software, BroadbandPro™ 2.0, with several industry-first features such as the ability to automatically geo-locate units using on-board GPS on its new Nitro58™ line of broadband solutions, breakthrough discovery that self-organizes network trees, and a unique slider control which allows users to easily set alert limits and parameters for network health diagnostics.

BroadbandPro 2.0 works with both new Intuicom Nitro58 broadband solutions as well as existing Intuicom networks.

A summary of unique features and significant benefits of BroadbandPro 2.0 includes:

- Advanced discovery self-populates and organizes network layout
- Network health/diagnostics at-a-glance on map
- User-configurable automatic alerts
- “Drag and drop” for simple, fast placement of units on map
- Easily configure units from a single window
- “Expert Mode” provides ultimate control
- GPS automatically locates ensuring always accurate location data (available on Nitro58™ Broadband Units)
- Expert Mode for the ultimate in control over advanced options.

“Enabling customers to obtain the most benefit from their broadband wireless networks, while making it a hassle-free operation, is our goal with this all-new BroadbandPro software. We’ve tried to automate the process as much as possible while still allowing for the flexibility needed by customers,” said Joe Tradii, Director of Product Management at Intuicom. “No other broadband solutions provider offers this combination of industry-leading features,” Tradii added.

Founded in 1999, Intuicom, Incorporated is a leader in providing ruggedized wireless solutions that enhance precision GPS applications, traffic control, intelligent transportation, and automation. Operating on all seven continents and in every possible climate, Intuicom solutions can satisfy the most demanding requirements. Intuicom is a privately held company headquartered in Boulder, CO.
