

28 Dec Intuicom Announces New Cellular Product Offering: The XC400 Industrial IoT LTE Router

SECURE, HARDENED, CAT 4 CONNECTIVITY FOR IIOT

Boulder, Co – December 28, 2022 – Intuicom, Inc., a premier wireless solutions provider since 1999, has announced the release of its XC400™ Industrial IoT LTE Router. The XC400™ is a feature-rich industrial router that delivers LTE connectivity demanded in mission critical applications. Designed to serve as the crucial link to your remote devices and provide Industrial Internet of Things (IIoT) connectivity, the XC400 enables secure, robust communications across a broad variety of equipment and applications.

The XC400 features a variety of interfaces that include dual Ethernet, RS232 and RS485 serial as well as digital I/O. Additional functionality is available through our library of applications that can be securely incorporated to expand its capabilities. Protocol translations, DNP3, Modbus RTU-ASCII-TCP and MQTT with Sparkplug B and more are available on-board.

Intuicom is in its third decade of developing and providing industrial wireless solutions into Traffic and Transportation, Construction, Agriculture and Automation. Tom Foley, Intuicom's CEO noted, "We are very excited about the addition of the XC400 to our Industrial wireless product offering. The XC400 continues our product focus to offer a feature rich product in addition to offering applications and compute at the edge. Customer feedback has been fantastic."

About Intuicom, Inc.

Intuicom provides wireless data solutions designed to satisfy the most demanding requirements. Enabling secure wireless connectivity, Intuicom solutions provide unsurpassed performance and flexibility. Founded in 1999, with headquarters in Boulder, Colorado, Intuicom's wireless solutions connect equipment and applications that drive our world, from traffic and intelligent transportation, to industrial automation and machine guidance.
