

## Intuicom Announces Its Newest Broadband Solutions Family of Products

**Boulder, CO, July 21, 2008** - Intuicom® Inc., a leader in wireless data solutions, has announced its newest line of Broadband Solutions that provide reliable high-speed connectivity utilizing a broad set of frequency bands and multiple configurations. Designed for high-bandwidth, long-range industrial applications, Intuicom's Broadband Solutions provide exceptional performance and security for a variety of applications ranging from Video, Security, Traffic Signal Control, Wireless Backhaul and Job Site WiFi.

Intuicom's newest line of Broadband Solutions emphasizes flexibility. Each unit is universally configurable as either an access point or endpoint, and each unit can operate within point-to-point, point-to-multipoint, or Mesh topologies. Intuicom's Broadband products are available in Stand-alone (SA), Integrated, or Access Point Cluster configurations.

Intuicom's Broadband Solutions provide wireless access in a wide variety of spectrum choices- including 700 and 900 MHz, 2.4, 4.9 and the full 5.8 GHz band to ensure exceptional performance. Utilizing "best-in-class" technology, and the most currently accepted security techniques, Intuicom Broadband Solutions lead the way in performance and efficiency. Combined with our extreme environmental specifications that exceed -40oC to + 80oC, this family of wireless solutions is uniquely positioned to serve the industrial and remote access marketplace.
