04 Apr Intuicom® Expands Capabilities Of BBX Broadband Family

ENHANCED FEATURES AND HIGHER DATA RATES HIGHLIGHT THE LATEST IMPROVEMENTS

Boulder, CO – April 4, 2022 – Intuicom®, Incorporated, a premier developer of wireless solutions, has announced an update to its BBX family of broadband products. This new release of the BBX products will expand data rates from 45 Mbps to 866 Mbps and offer both single and dual radio products in the 5 GHz and 2.4 GHz bands.

Intuicom's Broadband products combined with Broadband Pro 5™ Management software provides a complete communication solution for a host of industrial applications ranging from automation and video surveillance to transportation and wireless backhaul solutions. Joaquin Segl, of Intuicom's ITS team states "We are very excited to continue to add features and value to our broadband product offerings with the expansion of the BBX capabilities. The BBX family of broadband solutions has been a workhorse and this will allow our customers to do even more. In addition to the expanded performance capabilities, our network management software is providing valuable information to Network administrators to assess and optimize their network performance, provide the detailed information to address issues that arise, and the tools to more efficiently manage and support their networks. The initial response has been fantastic."
