

FOR IMMEDIATE RELEASE

Intuicom, Inc. Announces Release of New Nitro58™ Wireless Broadband Solution with Throughput Up To 300 Mbps and Several Industry Firsts.

Orlando, Florida - World Congress on Intelligent Transportation Systems (October 17, 2011) - Intuicom, Inc. has announced immediate availability of the Nitro58™ line of 5 GHz wireless broadband products, with support for 802.11a/n standards. The product is available in a variety of configurations, including Access Point, Station, and Repeater.

The new Nitro58 broadband product line boasts several industry firsts, including:

- GPS-based geo-location to ensure network topology is always current and setup is accomplished quickly.
- The product line is 802.3af and 802.3at compatible and
- 10/100/1000 (1 Gbps) capable.

No other Broadband Solutions Provider offers this combination of industry-leading features.

“With the Intuicom Nitro58 and the all-new Broadband Pro software, we set out to produce a revolutionary platform for broadband solutions. No one else offers this combination of industry-leading features while providing the easiest-to-use yet most robust operation available,” said Joe Tradii, Director of Product Management at Intuicom. “The new Nitro58 5GHz products, featuring 802.11n compatibility, provides the market with the speed and throughput required for today’s high-bandwidth applications,” Tradii concluded.

Founded in 1999, Intuicom, Incorporated is a leader in providing ruggedized wireless solutions that enhance precision GPS applications, traffic control, intelligent transportation, and automation. Operating on all seven continents and in every possible climate, Intuicom solutions can satisfy the most demanding requirements. Intuicom is a privately held company headquartered in Boulder, CO.
