

Pelco Offers Maximum Value for IP Video Migration with New Megapixel HVRs

Clovis, CA (February 23 2011) – The newest additions to the Pelco by Schneider Electric lineup of video recording solutions have arrived. Pelco hybrid video recorders were designed for customers who want to begin a step-by-step migration to megapixel video while still gaining maximum value from their existing analog video surveillance infrastructure.

This is made possible with the introduction of the new DX4700 and DX4800 hybrid video recorders – the latest in the Pelco DX4000 Series of video management solutions.

“While we’re excited about the move to IP and megapixel imaging in our industry, the fact is there are thousands of installations out there with perfectly good analog cameras. Where it makes sense to begin a migration toward IP video, these new HVRs are a perfect fit,” says Yvonne Schwemmer, Product Marketing Manager at Pelco by Schneider Electric.

Powerful Features +2

Available with eight or 16 analog channels — plus support for two megapixel cameras — DX4700 and DX4800 offer an unmatched combination of power and performance in a cost-effective package for mid-range applications.

“The best part is that DX4700 and DX4800 HVRs allow users to manage their security budget while migrating to IP at their own pace,” Schwemmer says.

Both models record up to 30 images per second recording on all channels. DX4800 takes it further, with the ability to record full frame rate video at full 4CIF resolution for all cameras. With this kind of recording power, previous analog investments gain an extended life.

“Users can now enjoy the benefits of megapixel image detail where they need it most – to watch registers, cash counting operations, high-value merchandise areas or lobbies and entrances,” Schwemmer says, “while still getting maximum value from existing analog cameras and cabling.”

Installation costs are even further reduced with easy, out-of-the-box-ready recording. An intuitive interface makes custom installation easy and decreases learning time for end-users.

Models

Overview

Benefits

- Cost-effective IP migration platform
- HD recording for sensitive areas
- Storage optimized partitions
- Out-of-the-box recording
- Leverages existing platforms

Applications

Excellent stand-alone or mid-range embedded system for IP migration to HD recording. Preserves analog investments while taking advantage of high-definition real-time recording. ATM/POS recording and bi-directional audio provide added-value for retail environments.

Description

DX4700 /DX4800 hybrid video recorders meet the demands of customers making a step-by-step migration to megapixel video while still retaining maximum value from their existing analog video surveillance infrastructure.

Available with eight or sixteen analog channels – PLUS 2 IP cameras, up to 3 Megapixel (MP) each for recording highly sensitive areas such as cash-counting, or high-priced merchandise – DX4700/DX4800 Series offers unmatched power and performance in a cost-effective package.

Features:

- 8 or 16 Looping Analog Channels
- PLUS 2 IP cameras, up to 3 Megapixel (MP) each
- H.264, High-Definition Hybrid Recording
- DX4800 - 30/25 IPS @ 704x480/704x576
- DX4700 - 30/25 IPS @ 352x240/352x288
- Connection to DX and DS DVRs/HVRs
- Internal Storage to 8TB
- DVD Standard
- PTZ, Coaxitron
- Supports KBD300A
- Bi-Directional Audio

Join Us At ISC West 2011

Pelco by Schneider Electric is delivering the best image quality in video security – and you can see it for yourself at ISC West 2011. Whether you're looking for high-performance IP domes, rugged IP megapixel cameras, software-only video management, integrated analog camera systems, network appliances, or complete end-to-end HD video security systems, you will be impressed with the array of new solutions from Pelco by Schneider Electric. Of course, it's never too early for a **sneak peek**.

And remember, if you can't be in Las Vegas for the show, check back regularly for day-of-show videos and much more to see what will be on display for the entire industry to see.
