Best-in-Class Optics and Low-Light Performance with Pelco Spectra IV 2.0

Clovis, CA (March 19, 2009) – Continually striving to enhance the optical performance of the Spectra Integrated Dome Positioning System, Pelco engineers have developed a new series of Integrated Optics Packages designed to do just that. With Spectra IV 2.0, Spectra systems continue to deliver the video that security professionals demand – high quality, crystal clear and reliable.

“When it comes to video security and having actionable information, it all starts with the picture,” says Alex Doorduyn, Pelco Product Marketing Manager. “And these redesigned cameras deliver unparalleled video quality and low-light performance – in any lighting challenge.”

Understanding the evolving demands of video security, Pelco has consistently challenged conventional thinking in order to bring to market products that outperform anything else available. For this reason, new technologies are constantly under evaluation and Pelco never stops working on next-generation optics capabilities for its camera systems.

Pelco has been at the forefront of the industry developing the most advanced and sought-after video security since entering the marketplace more than 20 years ago. And for more than a decade, Spectra has led the industry with unparalleled design and functionality. From modular design to advanced optics capabilities to the largest selection of models, Spectra IV 2.0 continues the Spectra tradition by delivering a picture so clear, its users will see the world in a whole new light.

About Pelco

Pelco, Inc. is a world leader in the design, development and manufacture of video and security systems and equipment ideal for any industry. Pelco produces the security industry’s most respected offering of discreet camera domes and enclosures, access control, video matrix systems, next-generation digital video recorders, IP solutions and fiber optic transmission systems for video/data and much more.
