R247-MX

Connected Stop/Warning Beacon or Sign

Increase compliance and safety across a range of roadway applications with high-intensity, connected beacons and signs.

- Every system ships with <u>3 years of free remote</u> <u>connectivity</u>
- Actionable email and text alerts
- ✓ Remote system access via MX Cloud™
- Quick setup and local access with MX Field App™ (iOS/Android)
- 'Smart module' design for simple installation and richer data
- Solar Power Report (SPR) available for every location

Free out-of-the-box connectivity

R247-MX systems have connectivity embedded into their design, making installation easy. From the moment a system receives power, it connects both locally to the MX Field App and remotely to MX Cloud, providing easy remote access to system status, settings and data.

Timely and actionable alerts

Cities can enable email and text alerts so they can know the minute there's an issue, be it a knockdown, dead battery or something else. Detailed location and module information reduce downtime and boost site visit efficiency while providing optimal citizen safety.

Comprehensive asset visibility and data collection

All MX systems come with MX Cloud, a web-based application that lets users remotely access system locations, alerts, settings and data. The GPS map not only gives cities better visibility, but enables streamlined, proactive asset management and future planning.

Long-lasting, reliable operation

Every MX module is built to last with durable, weatherproof aluminum and vandal-resistant wireless antennas. Solarpowered models are solar-sized to project location, backed by a Solar Power Report (SPR) to prove year-round sustainability.

Meets MUTCD Standards

Buy America/ BABA compliant

3-year limited warranty

MX Series Connective Capabilities

R247-MX

Connected Stop/Warning Beacon or Sign

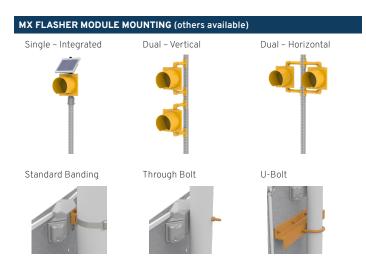

MX FLASHER MODULES

MX Beacon Module

MX LED Sign Module (many other signs available)

Meets MUTCD Standards: 2009 MUTCD, Chapter 4L, Flashing Beacons
Meets ITE recommendations for signal intensity and distribution
12" (305 mm) or 8" (203 mm) diameter LED modules, yellow or red
Yellow or black heads in UV-resistant polycarbonate or aluminum
Meets MUTCD Standards requirements for color, flash rate and dimming
3M High Intensity Prismatic or Diamond Grade retroreflective sheeting and components
UV-resistant polycarbonate channels and waterproof housings
protect wiring; includes fully integrated junction box
Many sign shapes, sizes and configurations available

WIRELESS COM	WIRELESS COMMUNICATION AND DATA COLLECTION
