

Dialight Lighting Technology

Indication

Illumination

In business since 1938, Dialight has been pioneering some of the most innovative applications in LED technology since it was developed in the early 1970s.

Our LED products for the electronics industry have given engineers better ways to indicate status on all kinds of equipment. Dialight LED traffic signals have saved municipalities millions of dollars in energy costs and maintenance. Our LED signal and marker lights for heavy-duty vehicles often outlast the vehicles themselves.

Signaling

We put our expertise to work for you by designing the most reliable and cost-effective LED products available. As a vertically integrated supplier, Dialight has the resources to design and produce everything in-house, supported by a global sales and distribution network. So if you're looking for the best and brightest in LEDs, look no further than Dialight.
