

BroadbandPro™ 2.0 Software

AUTOMATICALLY DISCOVER, CONFIGURE AND OPTIMIZE INTUICOM NETWORKS

Network tree structures and unit roles are automatically assigned.

“Drag and Drop” for simple, fast placement of units on map.

Units are automatically mapped for an easy overview of your network. Choose from several mapping options.

Changes to the tree structure and map are synchronized.

User-configurable automatic alerts

Network health is quickly assessed and diagnosed through user-configurable settings.

Intuicom’s BroadbandPro™ 2.0 software is a Windows® based, unified suite of tools that make it easier than ever to set up and optimize wireless broadband networks. BroadbandPro 2.0 features a number of industry-leading features, from a self-organizing display to a newer, more intuitive way to monitor and diagnose network health.

When the program is launched, it not only quickly discovers available Intuicom networks, but automatically creates a network tree structure, saving users the

time-consuming task of manually assigning roles radio by radio. Users will also appreciate the automatic geo-location enabled by the embedded GPS in the Intuicom Nitro58™ line of broadband units, ensuring location data is always accurate. Other time-saving, convenient features include the ability to diagnose network health at a glance, user-configurable alert limits, and single screen configuration. For a powerful yet easy way to work with wireless networks, BroadbandPro 2.0 provides an unequalled experience.

KEY BENEFITS

- Easier, more intuitive than ever
- New intuitive interface and single page setup
- Advanced discovery self-populates network layout
- Network health/diagnostics at-a-glance
- IP conflict resolution saves time
- User-configurable automatic alerts
- “Drag and Drop” for simple, fast placement of units on map
- Easily configure units from a single window
- “Expert Mode” for advanced configuration
- Automatic geo-location of Nitro58 products

BroadbandPro™ 2.0 Software

AUTOMATICALLY DISCOVER, CONFIGURE AND OPTIMIZE INTUICOM NETWORKS

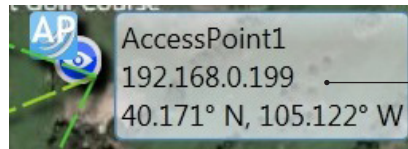

FEATURES

- Backwards Compatible with Intuicom BBS Broadband Radios.
- Customizable User Interface
- IP Discovery and Conflict Tool
- User-Friendly Interface delivers comprehensive radio configuration
- Network-Wide Monitoring and Diagnostic Display
- Bandwidth Test Tool
- Spectrum Analysis
- Real Time RSSI
- Client Connection Quality (CCQ)
- Audio Aiming Tool
- Wireless Security Management (WPA, WPA2-802.11i, TKIP, AES)
- Ping Watchdog
- Spanning Tree (STP, RSTP)
- Firewall Configuration
- Network Traffic Management
- User Login Controls
- SSH Client Toolbar
- Automatically Maps Radio Locations
- Color Coded Icons Display Radio Type, Network Health and Topology.
- Auto-Organizes Wireless Networks
- Advanced Control revealed through User Expert Mode

Easily configure units from a single window.

Network health may also be viewed graphically.

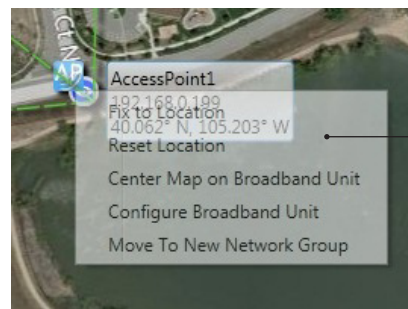

Units are automatically located via GPS saving time and ensuring accuracy (Nitro58™ only).

Unique slider control allows you to adjust upper and lower alert limits.

Set when network health line colors change based on your specifications.

Easily access basic options with a simple right click.

Note: Features subject to change without notice.
