

TC30

PRESENCE SENSOR

FOR VEHICLE CONTROL

- INPUT TO VEHICLE CLASSIFIER AND CONTROLLERS
- AUTOMATIC GATE AND TOLL BOOTH APPLICATIONS
- LOADING DOCK DETECTION APPLICATIONS
- ADJUSTABLE RANGE
(up to 22')
- EXTERNAL ADJUSTMENT PANEL
- EXTERNAL INDICATOR LEDS
(eases drive test confirmation)
- SINGLE LANE COVERAGE
- INSTALLS EASILY ABOVE GROUND
- FAIL-SAFE MODE (RECALL) IN EVENT OF POWER LOSS

The TC30 is an economical way to detect the continuous presence of an object within its detection pattern, stationary or in motion.

The TC30 is ideal for detecting vehicle presence in a right hand turn lane from a horizontal (side-fire) mount or in an individual lane from an overhead mount. It is also used in automatic gates and other parking control applications, as well as in loading dock applications.

The TC30 is easily mounted above ground. It requires no pavement cuts and can be installed with minimal or no traffic disruptions. Once installed, adjustments can be made via an external range control and external detection LED.
