

About Us

Pelco is a family owned business that began in 1985. Originally a manufacturer of Traffic Signal Hardware, we have grown our product line to include decorative lighting and utility hardware.

Over the years we have become an innovative leader in offering new unique products to the industry. We believe in producing only the best products at competitive prices. This is backed by providing great customer service and having quality people who are knowledgeable and who strongly believe in these high standards.

Pelco is represented by distributors in all fifty states, Canada, the Caribbean Islands, United Emirates, Pacific Rim and other foreign countries.

We hope you find our web site as productive and useful as our line of products. If you have any comments or suggestions please email us, we value any feedback.
