

### Our Company...

RuggedCom designs and manufactures ruggedized communications equipment for harsh electrical and climatic environments. Founded by people with strong backgrounds in electric utility and industrial automation we at RuggedCom have a first hand understanding of the needs and issues faced by our customers. This is reflected in RuggedCom's industry leadership in pioneering technologies and products which offered the world's first IEC 61850-3 compliant Ethernet switch suitable of electric utility substation environments, the world's first IEEE 1613 Class 2 error free communications devices, the world's fastest network fault recovery, and the world's first fully managed IP67 rated Ethernet switch. Other industry specific innovations have made our products the product of choice for high-reliability, high-availability, mission-critical communications networks deployed in harsh environments around the world.

Our corporate headquarters are located in Woodbridge, Ontario, Canada with regional offices in ten locations across the United States and Europe. RuggedCom sales representatives and distributors can be found in over 25 countries around the world to provide knowledgeable and timely support.

### Our Products...

RuggedCom products provide a level of ruggedness and reliability that have set the standard for ruggedized communications networks deployed in harsh environments. RuggedCom products offer extreme temperature (-40°C to +85°C) immunity, IP67 rated ingress pollution protection allowing immersion in water, Zero-Packet-Loss™ technology for immunity to high levels of electromagnetic interference, and enhanced rapid spanning tree (eRSTP™) performance for ultra high-speed network fault recovery. RuggedCom products can be found in mission critical networks used in creating smart, self-healing, power grids or "Smart Grid" systems, intelligent transportation systems for traffic management and railway control systems as well as process control and manufacturing automation systems used across multiple industrial sectors. Our products are at their best when the environment around them is at its worst. Our warranty underlies our beliefs.

"RuggedCom's mission is to provide innovative networking technology of the highest quality and reliability coupled with unsurpassed customer support..."
