

Wavetronix Company Information

Wavetronix LLC creates tools for intelligent transportation systems (ITS), including advanced radar sensors, power and communication solutions and data management appliances. Our innovative products and unmatched performance are changing the ITS industry and raising expectations for data detection, collection and management.

With a solid foundation in research and technology, Wavetronix is dedicated to increasing roadway efficiency and safety by providing traffic managers and engineers with solutions for enhanced data collection and analysis. Since its inception in 2000, Wavetronix has proven its leadership in the world ITS market by developing the most advanced technologies and then standing behind the quality of each product.

At Wavetronix, innovation is driven by talented engineering teams with experience in Radio Frequency (RF), microwave, electrical engineering, computer science and Internet technology. These teams are supported by sales, marketing and technical services departments dedicated to the success of each product.
