

Pole mount for Expanse sensors

Mount your XP20 sensor quickly and easily using the durable and flexible XP20 mount. With three axes of rotation and a slide-on sensor mounting feature, you'll have no trouble getting your XP20 to the angle and position you need.

- Three axes of rotation for getting the sensor into any necessary position and angle
- For even more flexibility, knuckles can be detached and reattached at a 90-degree angle
- Mount bolts can easily be loosened or tightened using a single wrench
- Attach the sensor quickly and easily by simply sliding it over the mounting tongue; for added stability, use the thumb screw to attach the sensor even more firmly
- Supports a 20-lb. (6.8-kg) load
- Rotating end piece means no rotating backplate is needed
- Heavy duty aluminum construction and powder coating make the mount sturdy and long-lasting
- Two contact points for attachment to circular or non-circular poles
- Accepts 3/4" banding
